

- Core Departments**
- Implement priority recovery actions on federal lands and for federal species as identified in recovery strategies, action plans and management plans
 - Provide support to program partners, Aboriginal people and stakeholders (through G&C programs) to implement actions identified in the recovery strategies, action plans and management plans, e.g.:
 - OGD actions on federal lands (IRF)
 - Stewardship actions on non-federal land (HSP)
 - Aboriginal community capacity development and habitat protection activities
 - Contributions to the WWF/EC ESRF to support research and education efforts
 - Review projects that require environmental assessments under CEAA
 - Establish and maintain federal SAR implementation policies and guidelines

- Core departments' implementation of priority actions
- G&C funding support
- Funding agreements
- CEAA recommendations
- Federal SAR implementation policies and guidelines

- Partners and Aboriginal People**
- Implementation of priority recovery actions by partners and Aboriginal people
 - Increased Aboriginal capacity to participate in SAR planning and implementation
 - Inclusion of SAR, their residence and/or critical habitat, in environmental assessments

- Stakeholders**
- Implementation of priority recovery actions by stakeholders
 - Stakeholders have the information necessary to contribute to the protection of species at risk and their habitat

- Conservation and protection of Canada's species at risk
