

# **Explanatory Note Regarding Amendments to the Recovery Strategy and Action Plan for the Banff Springs Snail (*Physella johnsoni*) in Canada**

## **November 2010**

As of November 2010, the following minor amendments were made in the above noted Recovery Strategy and Action Plan:

- Added “Species at Risk Act Recovery Strategy Series” header on cover page (English version only)
- Removed the word (proposition) from the French title of the document that is provided within the introductory pages of the English version
- Added ISBN and Catalogue no.
- Added Declaration (standard introductory wording found in all SARA recovery strategies)
- Corrected “its” to “it’s” in Section 1 – Background (English version only)
- Added date to header and moved page numbers from bottom centre to bottom right from Section 2.5.2 onwards
- Revised minor typographical discrepancies between the geographical coordinates presented in the map and in the map legend (Figs. 4b and 4h, in English and French versions)
- Changed all maps (Figs. 4a-4j) so that commas instead of decimals are presented within geographical coordinates (French version only)
- Replaced figure captions in French so that they read “habitat essential” rather than “habitat essentiel proposé” (Figs. 4a – 4j)
- Made minor translation/spelling revisions to Figs. 4a-4j in (French version only, e.g., change “bâtiment” to “clôture”)
- Based on changes to page numbering due to other amendments, revised page numbers in Table of Contents and Citation Recommendation
